

QUALITY POLICY

TÜV AUSTRIA MARINE is committed to providing added value to its customers with the development of its services, products and processes by adhering to the principles of impartiality and confidentiality, without compromising the principle of independence. Within the framework of the continuous improvement approach, it aims to increase the performance of the processes in an internationally competitive manner through periodic reviews by setting measurable targets for all business processes.

TÜV AUSTRIA MARINE supports its technically qualified specialists and qualified personnel through continuous training and effective communication. It aims to continuously increase the quality level by giving importance to teamwork so that the personnel it serves become more competent and able to use their talents at the highest level.

TÜV AUSTRIA MARINE offers innovative and result-oriented solutions by following the developing technology in order to meet the expectations and needs of all parties with a customer-oriented approach.

TÜV AUSTRIA MARINE develops its processes with the suggestions of its personnel within the framework of legal regulations and financial resources. It aims to establish quality awareness in all employees.

TÜV AUSTRIA MARINE aims to carry current technical, administrative and financial knowledge abroad to serve the purpose of making the name of the company and Turkey more known to the world.

TÜV AUSTRIA MARINE works to complete each project on time with the highest level of techniques, fully compatible with the project, in the desired quality and within the budget limits.

TÜV AUSTRIA MARINE aims to be an exemplary organization that respects the society and the environment we live in and to contribute to the country's economy by constantly improving its business volume.
